Scoring Supplement for the Repetitive Behavior Scale—Revised

The following is an alternative 5-subscale scoring solution for the RBS-R as detailed by:

Lam, K.S.L. (2004). The Repetitive Behavior Scale—Revised: Independent validation and the effects of subject variables.
Unpublished doctoral dissertation, The Ohio State University, Columbus.

INSTRUCTIONS: Please fill in score (0 to 3) endorsed for each corresponding question on the RBS—R (e.g., “1” refers to question number 1 on the RBS—R). *Note: several items on the RBS-R are not included in this scoring algorithm.* After filling in the ratings, sum each column to obtain a subscale score. Then, count the number of items endorsed for each subscale (any rating other than zero). Last, total the subscale scores and endorsement scores.

I: Stereotypic Behavior Subscale	II: Self-Injurious Behavior Subscale	III: Compulsive Behavior Subscale	IV: Ritualistic/Sameness Behavior Subscale	V: Restricted Interests Subscale
